KELPSTAR

Kelpstar is a natural concentrated extract of Ecklonia maxima brown seaweed. The high quality is guaranteed by the mechanical cold extraction process, which uses neither heat nor chemicals.

Kelpstar promotes the formation of new roots, promotes the distension of the floral organs, contributes to the enlargement of the fruits and to the increase of their weight in dry matter.

It can be applied by foliar application and by fertigation in the various phenological phases of the plant.

IN THE PLANT

- Promote formation of new roots

IN THE FLOWER

- Promotes relaxation of the floral organs

IN FRUIT

- It improves the fruit setting promotes enlargement
- Increases the dry matter

Brown seaweed Ecklonia maxima

Kelpstar is rich in amino acids, auxin-like phytohormones, carbohydrates and vitamins that ensure plant benefits such as resistance to biotic and abiotic stress and an increase in production potential.

The use of Kelpstar is authorized in organic farming.
