

MUGAVERO

MACAL

Macal is a liquid formulation that provides the simultaneous supply of calcium and magnesium, with the result of strengthening plant tissues and stimulating photosynthetic activity.

It prevents and cures, quickly and effectively, physiopathies from calcium and magnesium deficiencies, such as apical rot of tomatoes, necrosis of grape stalks, upward curling and necrosis of strawberry leaves

Macal Macal is specially indicated for cultivations of fruits and horticultural plants and is effective when applied directly onto the leaves or by fertigation.

The use of Macal is approved for **organic farming**.

PLANT

- Reduces physiopathies from Ca and Mn deficiencies
- Promotes leaf enlargement
- Stimulates photosynthesis

FUIT

- Prevents apical rot
- Improves organoleptic properties
