

# BIOTONICAL®

FLUID ORGANIC NITROGEN FERTILISER MIXTURE N (Ca) 6 (8)

- Prevents the development of calcium deficiency symptoms
- Improves consistency
- Reinforces cell walls
- Increases the shelf-life

## BIOTONICAL IS AN ORGANIC CALCIUM-BASED BIOSTIMULANT (Ca) ALLOWED IN ORGANIC FARMING

**BioTonical** is a biostimulant authorised in organic farming obtained by complexing calcium (Ca) with amino acids and peptides; the presence of the amino acids and peptides enables calcium to be transported within the cell membrane, increasing its efficacy.

**BioTonical** is enriched with extracts of the brown seaweed *Ecklonia maxima* from the west coast of South Africa.

Calcium plays a key role in the thickening and strength of cell walls and the consistency of fruit and vegetable pulp.

The administration of **BioTonical** from fruit set to shortly before harvest improves the consistency, organoleptic characteristics and shelf-life of the final product.

## DOSES AND METHOD OF USE

CROPS	FOLIAR ml/hl	FERTIGATION l/ha
<i>Cereal crops</i>	300-400	-
<i>Floriculture and ornamentals</i>	300-400	5-10
<i>Forage crops</i>	300-400	-
<i>Fruit crops</i>	300-400	5-10
<i>Industrial</i>	300-400	5-10
<i>Horticultural</i>	300-400	5-10
